According to this rule, the board composition must be set with regard to appropriateness to the company's operations and phase of development, and must collectively exhibit diversity and breadth of competence, experience and background among the directors elected by the Annual General Meeting. An equal balance between the genders should be aimed for. The objective of the diversity policy is to underline the importance of appropriate diversity within the Board with regard to gender, age, nationality and experience, professional background and business expertise. The Nomination Committee endeavours to achieve diversity and gender balance on the Board. This is evaluated each year along with a continuous process to identify future board candidates with relevant backgrounds and experience. Remuneration of the Group Management Team

Guidelines for remuneration of Group Management Team

The current guidelines for remuneration of the Group Management Team were adopted by the AGM on 2 April 2020. The total remuneration shall be market-based and competitive, and shall be proportionate to the individual's responsibilities and powers. In addition to base salary, remuneration of the President and CEO, other members of the Group Management Team and other executives reporting directly to the President and CEO can include: short-term variable compensation, share-based long-term variable compensation, pension benefits, termination benefits and other benefits.

Short-term variable compensation

Short-term variable compensation is linked to specific business targets and is derived from the annual business plan approved by the Board of Directors. The short-term variable compensation is delivered through a cash-based bonus program. Short-term variable compensation is based on personal targets linked to Cloetta's Strategy and two operating targets:

- Net sales growth
- Operating profit

Share-based long-term variable compensation

Share-based long-term variable compensation consists of the share-based long-term incentive plans, which are resolved on yearly by the AGM. It is aimed at increasing value for the Group's shareholders by promoting

and upholding the senior management's commitment to the Group's development, and thereby aligning the interests of the group management team and other key employees with those of the shareholders to ensure maximum long-term value creation. The targets for share-based long-term variable compensation are the compound annual growth rate and adjusted operating profit margin.

Pension benefits

Pension benefits vary depending on the agreements and practices in the country where the individual is employed. Defined contribution plans are strived for, which means that pension benefits most often consist of defined contribution plans for which annual premiums are paid as a percentage of pension-qualifying salary up to the age of retirement. Variable salary and benefits are not pension qualifying unless provided by law or collective agreement. The retirement age is not less than 60 years and not more than 67 years.

The Board has the right to deviate from these principles in individual cases where there is special reason to do so.

Termination benefits

Upon termination of employment on the part of the company, the notice period shall be no longer than 12 months. Any termination benefits may not exceed one fixed annual salary. Due to employment contracts entered into by Leaf prior to Cloetta's acquisition of the

company, there are contracts with members of the Group Management Team granting termination benefits exceeding 12 monthly base salaries.

Other benefits

Other benefits consists mainly of sign-on fees, severance pay and company car benefits.

President and CEO

The retirement age is 65 years. The pension terms consist of a defined contribution plan for which annual premiums are paid up to the age of retirement in an amount corresponding to 30 per cent of pension-qualifying salary, consisting of base salary. Variable compensation and other benefits are not pension-qualifying.

The President and CEO has a notice period of six months. Upon termination on the part of the company, the notice period is 12 months.

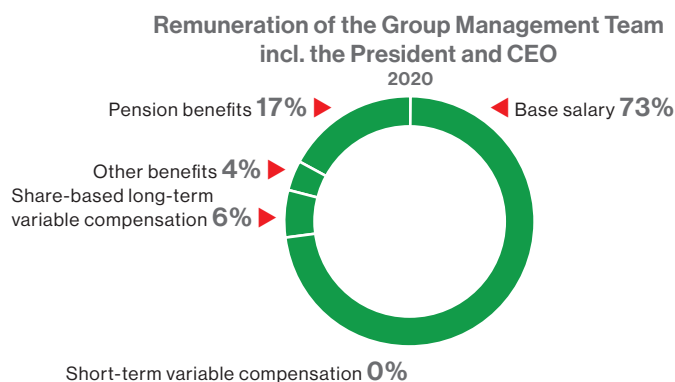

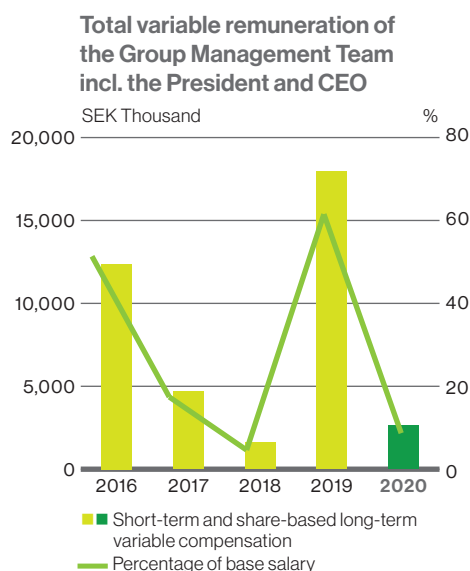

Remuneration in 2020

In 2020, the total remuneration of the Group Management Team including the President and CEO amounted to SEK 39,724 thousand (56,808) including pension benefits, and SEK 32,915 thousand (49,670) excluding pension benefits.

Share-based long-term incentive plan for senior executives

On 2 April 2020, the Annual General Meeting approved the Board's proposal for

	Short-term variable compensation as a percentage of base salary	
	Target level	Maximum level
President and CEO	50 %	100 %
Other Group Management Team, average	34 %	68 %

a share-based long-term incentive plan. The plan aligns the interests of the shareholders with those of the Group Management Team and other key employees in order to ensure maximum long-term value creation.

A personal shareholding in Cloetta is required for all participants. See page 67 and Notes 23, 27 and 28 for more information about share-based payment.

The Board of Directors' report on the remuneration committee's evaluation of remuneration of the Group Management Team

The Board of Directors has established a remuneration committee consisting of three members who prepare recommendations for decision by the Board regarding remuneration principles, remuneration levels and other terms of employment for the Group Management Team. The recommendations have included the proportional distribution between base salary and variable compensation and the size of any salary increases. Furthermore, the remuneration committee

has discussed pension terms and termination benefits.

The remuneration committee is also entrusted with the task of monitoring and evaluating programmes for variable remuneration of the Group Management Team, application of the guidelines for remuneration adopted by the AGM and the current remuneration structures and remuneration levels in the company. Pursuant to paragraph 9.1, points 2 and 3 of the Swedish Code of Corporate Governance, the Board hereby presents the following report on the results of the remuneration committee's evaluation:

The variable compensation that is payable according to the guidelines is linked to both the individual's responsibility for results and the Group's profitability targets, which contributes to value growth for the company's shareholders.

Market surveys are conducted regularly with respect to salary statistics, remuneration structures and levels for variable remuneration. In the opinion of the remuneration committee, Cloetta's remuneration

structures and remuneration levels have allowed Cloetta to recruit and retain the right personnel to the Group Management Team.

Remuneration of the President and CEO for the financial year 2020 has been determined by the Board. Remuneration of other members of the Group Management Team and of other senior executives has been determined by the President and CEO. Since the 2020 AGM, the remuneration committee has met on four occasions. The full principles for remuneration of the group management team in 2021 will be presented ahead of the AGM on 6 April 2021. The suggested principles for 2021 will deviate marginally from those applied in 2020.

For more information about remuneration of the President and CEO, see the company's Remuneration Report published on the website.

Internal control over financial reporting

Cloetta's internal control over financial reporting is based on the framework published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO framework). The key objectives of Cloetta's internal control environment for financial reporting are that it is appropriately structured and effective, provides reliable reports and complies with any applicable laws and regulations.

The Board of Directors has defined policies regarding processes, roles and responsibilities that are vital for financial reporting and the internal control environment of the company.

Roles and responsibilities

The Board of Directors is responsible for establishing fundamental rules and guidelines for internal control. The audit committee assists the Board of Directors with its oversight of the performance of the company's risk management function and internal control insofar as these affect the company's quality and integrity of financial reporting. The Board of Directors and the audit committee interact directly with the external auditors.

Where the Board of Directors is responsible for establishing fundamental rules and guidelines, the President and CEO is responsible for the design effectiveness, implementation and supervision of monitoring of the internal control environment within the Group. The CFO is responsible for the design and operating effectiveness of the internal control environment within the Group. At a local level, the design and operating effectiveness of the internal control environment is the responsibility of each of the area Presidents and local and regional finance teams.

Control environment

The foundation for Cloetta's internal control environment is the company's corporate culture and behaviour, amongst others, which are reflected in:

- Performing our business with integrity and ethical values. Cloetta's Code of Conduct, fraud and whistleblower policy, anti-bribery and anti-corruption policy and trade

control policy form the platform for a set of guidelines and principles built on Cloetta's core values that govern financial reporting;

- The management's conduct and working methods based on a clearly defined working process described in documents such as:
 - Rules of procedure for the Board of Directors
 - Instructions for the President and CEO
 - Instructions for financial reporting
 - Finance policy
 - Rules of procedure for and instructions to the audit committee;
- Rules for representations, commitments and disbursements to third parties clearly defined in the Group's authorisation framework;
- Processes for leading and developing employees in the organisation and the attention dedicated to these matters by Cloetta's Board of Directors.

Financial reporting competencies

The Group Management Team and local management teams ensure that the company has employees with the right competency in all key (financial) positions and that there are procedures in place to ensure that employees in key (financial) positions have the requisite knowledge and skills.

Human Resources (HR)

The guidelines and processes for management of human resources play a fundamental role in Cloetta's system of internal control and help ensure the effectiveness of internal control. Key processes include compensation and benefits, HR development, recruitment, allocation of resources, performance management and routines for feedback to the employees.

Risk assessment

Central and local risk assessments are prepared and monitored periodically. In these assessments the likelihood that risks could occur and the potential impact they may have are assessed. Furthermore, the velocity at which a risk could occur is considered. Business risks as well as financial reporting and other risks are considered in the risk assessments.

Central and local financial reporting risks are assessed with respect to account balance assertions such as existence, completeness, rights and obligations, valuation and allocation, presentation and disclosure assertions and financial impact. The internal control environment is designed to mitigate risks identified to a level considered acceptable by management.

Certain specific risks, for example risks related to taxes and legal matters and other financial risks, are reviewed pro-actively on a periodic basis. Risks and risk management are reported on separately in more detail in the annual report, on pages 76–80. Tax, legal and other financial risks are reflected based on management's best estimate and judgement, and in accordance with the applicable accounting standards in the consolidated financial statements.

Fraud risk

Cloetta's Group Management Team, local management teams and the central finance team are responsible for addressing the risk of fraud and for carrying out a continuous assessment of the risk for fraud with respect to the prevailing attitudes, incentives and opportunities to commit fraud. The Board of Directors has issued a fraud and whistleblower policy aimed at preventing dishonest and/or fraudulent activity and to establish procedures for reporting fraudulent activities to Cloetta's management and/or audit committee.

In addition to the fraud and whistleblower policy, Cloetta has adopted an anti-bribery and anti-corruption policy. The purpose of the policy is to prevent bribery and corruption by any employee or third party acting on behalf of Cloetta. The trade control policy summarises potentially applicable sanctions and export control rules, and compliance procedures to be followed by all Cloetta employees. The purpose of this policy is to provide guidelines to ensure compliance with all local trade control laws and regulations including countries through which shipments or financial transactions flow.

Basis for risk assessment

Existence, reported assets and liabilities exist on the reporting date.

Completeness, all transactions during the reporting period are recorded and reported.

Rights and obligations, assets are the rights of the organisation and the liabilities are its obligations as of a given date.

Valuation and allocation, all items in the financial reporting are reported in compliance with IFRS valuation principles and are correctly calculated and summarised and appropriately recorded.

Presentation and disclosure, items in the financial reports are properly described, sorted and classified.

Control activities

Control activities are the policies and procedures that help ensure that management’s directives are carried out and that the necessary actions are taken to address risks that may hinder the achievement of the company’s objectives. Control activities occur throughout the organisation, at all levels and in all functions. They include a range of activities as diverse as approvals, authorisations, verifications, reconciliations, reviews of operating performance, security of assets and segregation of duties.

Control activities are embedded in Cloetta’s business processes and play a key role in ensuring effective internal control in the company. Local management is responsible for having all required control activities in place and maintained within their organisations. The CFO is responsible for ensuring that control activities are designed and operating effectively and are maintained centrally. The control environment is based on a balanced mix of preventive and detective controls and of automated and manual controls. In addition to a standard set of automated controls embedded in Cloetta’s central ERP system, local management teams are encouraged to have as many automated controls as possible, especially for routine transactions. Nevertheless, there are also manual control activities in place to verify that the automated controls function as intended and for non-routine transactions.

Continuous reviews are performed by the Group Management Team and local management teams to safeguard proper and accurate financial reporting. These reviews are incorporated into the business processes and are an important part of Cloetta’s monitoring controls. The local management teams are responsible for ensuring compliance with relevant laws and regulations in their respective areas of responsibility. All identified financial reporting risks are covered by one or more control activities.

Monitoring and improvement

Cloetta continuously strengthens its internal control environment by evaluating the design and operating effectiveness of the environment. During the year, procedures are performed to verify the design and operating effectiveness in specific areas. These procedures are performed on a central and a local level and are intended to address any weaknesses or inefficiencies in the internal control environment. Internal control deficiencies detected through the ongoing monitoring activities or separate evaluations are reported upstream and corrective actions are taken to ensure continuous improvement of the internal control environment. On a quarterly basis the follow up and status

of any weaknesses identified by internal procedures or external audits are reported and discussed with the persons involved and members of Cloetta’s Group Management Team.

Reporting routines

An effective system for internal control requires sufficient, up-to-date and reliable information both of a financial and non-financial nature. As far as possible, management reporting is directly linked to the financial reporting and to the consolidation tool.

Local management teams report their financial results periodically and in accordance with the Group’s accounting and reporting policies. This reporting is the basis for Cloetta’s internal and external reporting and serves as a basis for legal and business reviews. The business reviews are carried out according to a structure in which sales, earnings, cash flow and other key ratios and trends of importance to the Group are compiled and form a basis for analysis and actions by the management and controllers at different levels. Other important and group-wide components of internal control and reporting routines include the annual business planning process and the monthly and quarterly forecasts.

To ensure the efficiency of internal control over financial reporting, reviews are carried out by the Board of Directors, the audit committee, the President and CEO, the Group Management Team, the central finance and treasury team and the Group’s various subsidiaries. Every month, financial reports are reviewed against budget

and established targets, and the results of self-assessments in the Group’s companies are reported. This review includes follow-up of observations that are reported by Cloetta’s auditor.

The company’s financial situation is discussed at each Board of Directors meeting. The Board’s audit committee has important monitoring and control duties with regard to loans, investments, financial management, financial reporting and internal control. The audit committee and Board of Directors review and formally approve interim reports and the annual report prior to publication. In addition, the audit committee receives regular reports from the independent auditor.

Communication
Internal communication

Effective communication ensures the information flows in the organisation. Separate communication channels are used to communicate internally, based on what is most effective.

External communication
It is also important to maintain communication about relevant policies with external parties such as customers, suppliers, regulators and shareholders.

External communication is carried out in accordance with legal requirements and the Corporate Communications and IR policy.

Evaluation of the need for a separate internal audit function

There is currently no internal audit function at Cloetta. The Board of Directors has reviewed this matter and determined that the existing structures for monitoring and evaluation provide a satisfactory basis for control. For certain special internal audit activities, external resources are used.
